

Criteria for Recommending Additional Project for Funding for an Ongoing Project

In addition to the above criteria, the following criteria will be used qualitatively for recommending to the Executive Committee additional funding of up to \$25,000 for an ongoing Water Research Foundation project:

- **Distinct from original scope of work:** Funding would further investigate compelling findings that arise during the course of an ongoing project. The additional tasks should not have been addressed in the original scope of work.
- **Impact of the additional work:** Additional tasks would greatly strengthen the results of the study for the water community.
- **Timely and cost-effective:** Funding add-on would enable additional tasks to be completed in a timely and cost-effective manner.
- **Validated by the PAC:** The ongoing project PAC should be supportive of the potential funding add-on and additional tasks.
